Teme pentru stagii de practică

2015-2016

Track 1 - Cloud solutions

T1.1 Azure Machine Learning - develop analytics and predictive solutions using machine learning algorithms in the cloud.

T1.2 Big Data - develop solutions that deal with big data using Apache Hadoop technologies in the cloud (Azure HDInsight).

T1.3 Internet of Things - develop solutions to collect and process very high volumes of sensor data generated by sensors. Store and query in real-time high volumes of data streams (Azure Stream Insight).

Track 2 - Mobile solutions

T2.1. Cross-platform mobile apps using Xamarin.Forms - develop cross platform mobile applications using C# and Xamarin.Forms

T2.2 Cross-platform mobile apps using Apache Cordova - develop cross platform mobile applications using HTML5/JS/CSS using Apache Cordova.

T2.3 iBeacons - develop mobile solutions using the iBeacons technology.

Track 3 - Windows 10

T3.1 - Universal Windows 10 apps - develop universal Windows 10 apps using the PRISM framework.

T3.2 - Develop universal data repositories using EntityFramework 7 and SQLite
